

DOCK LEVELER ENERGY SAVER SEALING SYSTEM

THE ALL-SEAL™ DOCK LEVELER ENERGY SAVER SYSTEM PROVIDES PROTECTION FROM DIRT, PESTS, INSECTS AND WEATHER INFILTRATION WITH A UNIQUE TRIANGULAR BRUSH AND FOAM SEALING SYSTEM. UNLIKE TRADITIONAL SEALS THAT ARE INEFFECTIVE ABOVE FLOOR LEVEL, ALL-SEAL™ PROVIDES A SUPERIOR SEAL THROUGHOUT THE LEVELERS FULL OPERATION RANGE. THE HEAVY-DUTY NYLON BRUSHES ARE INSTALLED IN AN ALUMINUM EXTRUSION FOR EASE OF REPLACEMENT. THE VINYL WRAPPED FOAM FEATURE PROVIDES ADDITIONAL INSULATION IN THE STORED POSITION. A FACTORY INSTALLED REAR SEAL IS ALSO INCLUDED WITH NEW NORDOCK LEVELERS.
