

## NORDOCK® SEALS THE DEAL!

On November 1st, 2018, Lineage® Logistics opened the world's latest next generation cold storage facility. The 280,000 square-foot rail and trailer loading facility, works in support of the global supply chain. Lineage® Logistics, Dreisbach Enterprises and NORDOCK® teamed up in this joint venture setting a new standard in efficiency, cold chain integrity, food safety and speed in the temperature-controlled and transportation industry.

This state of the art cold-chain facility offers 20,000 pallet positions, three blast cells and a 100,000-square-foot, high-cube, multi-temperature storage environment. It is projected to deliver up to 1 million tons of perishable product through the port annually. Dreisbach will be handling over 50,000 trailers and process 9,000 rail cars per year, which is expected to eliminate truck usage for transfer between ships and rail.

Dreisbach Enterprises acknowledged NORDOCK® products as the most effective world class solutions to problems he had first-hand experience with, including end loading, environmental control, hand loading resulting in risk of injury and millions in additional labor costs.

NORDOCK® NVTL Vertical Storing levelers and NRTL BOXCAR™ Series levelers equipped, with NORDOCK® Telescoping Lip Technology, provides lifetime cost of ownership solutions for Dreisbach. Solutions included; precise telescopic lip extension (eliminating flip motion prevents impact product damage), creating a safer bridge to any truck in any loading scenario (even with cargo stacked all the way to the rear as end loads), eliminating 100% of additional labor/handling costs, eliminating all end load issues forever and making all aspects of loading faster and safer. All dock and rail door openings include a BUMPER-TO-BUMPER™ 360 Degree Pit Seal, which saves energy and delivers the industry's best cold chain integrity available.

NORDOCK® sealed the deal in providing hundreds of dock leveling equipment products and saving them over **\$1 Million Per Year in Labor Costs!**

- **90 Truck Loading Dock positions now include:** Model NVTL COLDSTORAGE™ Series vertical telescoping lip levelers, DC-300 DOK-CHOCK™ restraints, LOGI-SMART® control panels, Combination FOAMFRAME™ dock shelters with RAINSHIELD trailer top seals, BUMPER-to-BUMPER™ 360 Degree pit seals, IMPACT™ Series steel face dock bumpers, LED dock lights and signal lights and signage.
- **18 Rail Loading Dock Positions now include:** Model NRTL BOXCAR™ Series telescoping lip levelers with hydraulic side-shift, LOGI-SMART® control panels, Model IR-700 inflatable four side shelters, and LED dock lights.

Discover the latest NORDOCK® solutions as we will be showcasing our latest industry leading designs at ProMat 2019 held April 8-11 at Chicago's McCormick Place.
