

IWS™ INTRODUCE THE NEXT GENERATION OF MATERIAL HANDLING SOLUTIONS AT PROMAT 2019

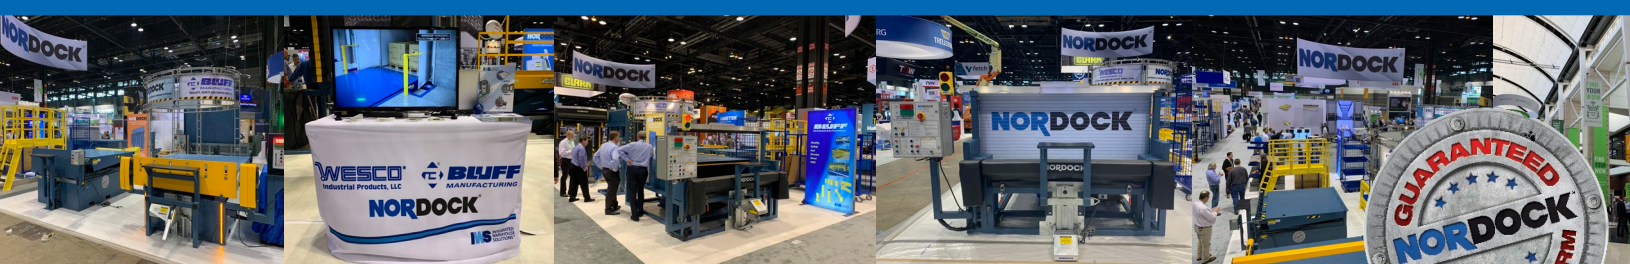

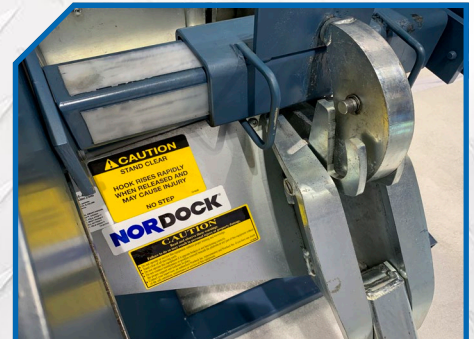

IWS™ sets the bar high in their record-breaking debut at the largest material handling and supply chain trade expo in North and South America. Held on April 8-11 2019, ProMat set a new record in the 34-year history of the event, with nearly 50,000 manufacturing and supply chain executives, creating a huge 11 percent attendance leap over the previous show in 2017. The expo covered 425,000 net square feet of exhibit space on two show floors at Chicago's McCormick Place, with over 938 exhibiting companies.

For the first time in history NORDOCK®, BLUFF™ and WESCO® teamed up as IWS™ (INTEGRATED WAREHOUSE SOLUTIONS™), to represent the coming together of quality known brands within the material handling industry to serve the needs of customers and prospects on an international basis. Between combining strengths in product development, customer service, manufacturing and building relationships, our booth showcased the best in class industry leading material handling and warehouse safety products solutions.

An advanced team of sales reps led the booth from each company standing ready to assist and introduce our impressive lineup of products. Throughout the entire event thousands of clients were highly impressed with the level of quality and innovation all products had to offer.

Overall, our dedicated teams of professionals were amazed with our record-breaking results of the show and the trending generated around our latest lineup of products. IWS™ would like to take this opportunity to thank everyone who stopped by our booth and contributed to making this show such a success and our best to date! We would also like to thank our team of dedicated employees who acted as brand ambassadors during the show, as well as all those back home whom without their hard work and contributions, none of this would be possible. Thank you all for a wonderful show and we hope to see you again soon!
