

TLH RETROFIT™

THE BETTER LEVELER

ELIMINATE END-LOADING ISSUES AND ENHANCE SAFETY

With Nordock's 8' telescoping-lip leveler you can:

- retrofit into existing docks without recutting the pit
- fully cube out trailers
- reduce energy loss & dock contamination
- banish manual loading & unloading
- save dock maneuvering room
- decrease equipment & freight damage
- drive the pace of dock operations

“

With so many performance advantages, plus being ideal for retrofits, this TLH leveler eliminates all end-loading issues.

”

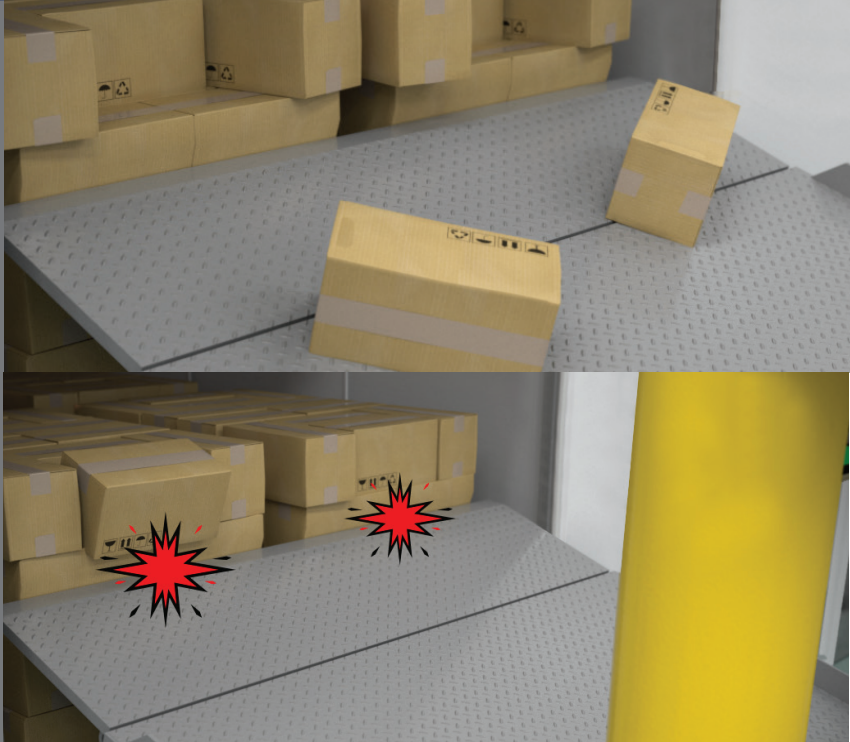

FASTER. MORE PRECISE. SAFER.

Do you need an end-loading solution that gives back lost time, reduces energy loss, increases dock capacity *and* is a simpler upgrade or retrofit?

(above)
The TLH Retrofit from Nordock is the best available solution for loading docks that need to step it up. With a list of advantages that traditional vertical and lip-flipping dock levelers can't touch, Nordock's 8' TLH is the obvious fast-fix choice for underperforming docks.

(right)
Standard hinged-lip levelers can be a challenge with end-loaded trailers.

(left)
With it's telescoping lip, the TLH Retrofit makes loading and unloading cubed-out trailers easy, quick and damage-free.

Nordock 8' TLH Retrofit Advantages

- Retrofit Capability:**
The TLH Retrofit easily retrofits into a standard pit (8' length and 19" depth), which means you don't have to cut a new pit anywhere you have standard-size pit levelers rusting in place.
- A Better Seal:**
Docks will seal better in loading position (great for cold storage!) and an optional bumper to bumper foam seal under the leveler provides a full-360 seal. Lost energy is lost profit.
- Take Care of Cargo:**
Precisely position and extend the telescoping lip to the truck to keep it from damaging product like a traditional hinged lip might. Precious cargo is better protected, and shippers will notice.
- Safety First & Foremost:**
Eliminate the dock-to-truck gap preventing injuries and reducing forklift damage or "stuck truck," taking care of your people and equipment.
- Eliminate Vehicle Restraint Issues:**
Traditional hinged-lip levelers can interfere with the vehicle restraint in a low-dock situation when the lip is down. A telescoping lip eliminates that.
- Cost Savings:**
The telescoping lip lets you extend the lip onto a truck that is "end loaded" or "cubed out" without damaging the goods. This means you don't lose time or labor cost to manually unload the first pallet before a forklift can be used.
- Faster Flow of Freight:**
All of these advantages help the pace of dock operations and your dock's throughput, increasing revenues.

It's the smarter dock solution, with the lowest total cost and a great warranty, it's the best long-term profitability decision you could make.
